IGF 2300 / B40P Pizza Roller

- Furnace varnished steel body.
- Two pairs of parallel and adjustable rollers to allow for variation in thickness of dough and for either square or rectangular sheet.
- Can obtain round sheet (just need to turn the dough round 90° once it comes out of the upper rollers and before it enters the lower rollers).
- System of lower rollers and an idle roller favour the process of putting the dough into the machine (system patented by IGF).
- Separate roller protectors for better OH&S (patented by IGF).
- Transformers have gears made of special resins; they have been pressed, instead of indented, so as to last five times more than normal ones (IGF patented).
- Foot control pedal.
- Internal reinforcements to prevent the frame from bending.
- *IN ACCORDANCE WITH WORLDWIDE HEALTH AND SAFETY REGULATIONS*

IGF 2300/B40 Pizza Roller
